### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the title,

"Method of Recycling Process Cartridge and Method of Recycling Metal Materials Constituting Process Cartridge Container Toner" has been changed to - -Method of Recycling a Process Cartridge- -.

In the specification,

**Page 1,** *Line 17*, "coping" has been changed to - -copying- -;  
*Line 24*, "techniques" has been changed to - -technique- -.

**Page 2,** *Line 3*, "coping" has been changed to - -copying- -.

**Page 10,** *Line 8*, "blade for crushing 24" has been changed to - -blade 24 for crushing- -.

2. The following is an examiner's statement of reasons for allowance: Regarding claim 1, the prior art does not teach or suggest separating metal materials including at least one of ferrous materials and aluminum material from other materials of the main component parts of the process cartridge disassembled in the crushing and disassembling step, melting the separated metal materials to thereby change the separated metal materials to forms capable of reuse as ferrous materials and/or

aluminum materials, in combination with the other claimed limitations; Regarding claim 4, the prior art does not teach or suggest crushing the process cartridge to disassemble photosensitive drum parts, charging roller parts, the cleaning blade parts and the development sleeve parts of the process cartridge and to separate the photosensitive drum parts, the charging roller parts, the cleaning blade parts and the development sleeve parts from container parts of the process cartridge made of a resin material, in combination with the other claimed limitations; Regarding claim 5, the prior art does not teach or suggest crushing the process cartridge to such an extent that the structural form of the process cartridge is changed and so that a process cartridge container portion made of a resin material, and a charging roller, a cleaning blade, a development sleeve and a photosensitive drive of the process cartridge are disassembled, separating each component material of the container portion, the charging roller, the cleaning blade, the development sleeve and the photosensitive drum, in combination with the other claimed limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
